Home cinema

There are many products that you can install easily and affordably to transform your home entertainment and living.

Whether you want a super slim screen TV, or a complete home cinema experience, we can make sure you get the best seat in the house

DPP install the latest products from leading manufacturers and our experienced and highly trained engineers make sure you get the very best home cinema experience possible.

Multi-room audio visual

Flexible and high definition audio and video distribution means that AV sources are available anywhere in the home with no loss of quality. Sources such as SkyHD, BluRay and online services such as Spotify, iTunes and internet radio can all be enjoyed anywhere in the home with sound perfectly balanced between surround sound and stereo rooms.

DPP have the knowledge and expertise to install the best solutions available

Man caves & Femme dens

Create your own garden man cave entertainment room or, as some people call it, a garden room, man cave or femme den, so you can enjoy all of the pleasures of high-tech media in the comfort of your own home or in a garden building. We can install the latest systems to suit your needs and wherever you have the designated space, which could be a basement, spare room or garage space, or even a garden building.

Lighting control

At the touch of a button with leading edge lighting control systems, you can control the light and blind levels in a single room or throughout your whole home using a hand-held remote, wall-mounted keypad control, or through your tablet or smart phone.

Create just the right light for any activity or mood and save energy while you do it. Whether it's in the kitchen, living room, bedroom or out on the patio and garden, you can have exactly the right lighting to meet the mood or activity.

Networking

It has never been more important to ensure that you have a secure, strong and reliable network within the home to ensure that all of your connected devices, stay connected! A well installed network allows viewing and listening experiences offered by all of your providers to be enjoyed without interruption or slow downloads.

Whether you're new to smart home technologies or a fan and want to update, we would love to talk to you.

Home security

Home security is becoming increasingly important for households of all sizes as sadly burglary rates are increasing. With the advent of Smart Homes we can expect technology to play an even bigger part in home security in 2020 with more residential properties equipping themselves with solutions that can be accessed remotely via mobile devices including smartphones, tablets and laptops.

CCTV

Physical security using automatic security gates, CCTV and movement sensors can be a great deterrent to a burglar. Many burglaries are committed during the day and on an opportunistic basis, when the homeowners are out to work or shopping. By remote monitoring your property you can receive alerts when callers arrive or if any attempt at break in happens.

Control systems

With all of these smart home technologies within your home, we want to ensure that you don't have a huge stack of remotes to file through just to turn on the TV!

We can install a solution that's right for you, whether you want to control one room, or have total control of your home security, smart devices and lighting. A great feature of these is an 'Away' mode, mimicking lighting sequences across your home in your absence!

Smart, secure homes that suit your wants and needs
